Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,981,557, JP 10-212271 and Nakajima et al as stated in the previous office action.

There is no patentable distinction see between the instant application and the above references because they both use the same compounds for essentially the same use, that is the same symptoms associated with stomach dysfunction such as nausea and bloating, for example.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combined teachings of US 5,981,557, JP 10-212271 and Nakajima et al.

These references all teach essentially the same thiazole compounds for treating essentially the same disorder, stomach dysmotility. Applicant teach the same, but

Art Unit: 1626

instead use different words to describe the disorder, namely, gastric accommodation by relaxing the gastric fundus.

It would have been prima facie obvious to one having ordinary skill in the art at the time the application was filed to use the same thiazole compounds for treating stomach problems associated with gastric immobility wherein the symptoms are nausea, vomiting, bloating etc., motivation being that use of different words to describe the same use does not rise to the level of a new and unobvious method, wherein further the same compounds would be expected to treat the same or similar disorders of the stomach, absent evidence to the contrary.

Response to Amendment

Response to Arguments

Applicant's amendment and arguments filed 1/23/07 have been fully considered but they are not persuasive. Applicant is arguing on one point, the location of the activity, wherein none of the instant claims are so limited. Furthermore, the references as a whole teach the treatment of the stomach period having dysmotility.

There is no patentable distinction seen between the prior art use of treating gastric motor dysfunction (US'557), gastrointestinal tract motion (JP'271) and stomach dysmotility (Nakajima et al) and the instant use of treating gastric impaired gastric accommodation by relaxing the gastric fundus, wherein further the symptoms are essentially the same. Moreover, assuming that applicant claim to discover how the prior

Art Unit: 1626

art compounds worked for treating the same disorder, this does not give rise to the level of a new use for the same compound. It's the same use.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
